

SOCIOLOGICAL ANALYSIS OF DISEASES' INFLUENCE ON THE ADAPTATION PROCESS OF THE ORGANISM TO STRESS

Vladimir Savin

**Candidate of philosophy, lecturer in Ural State Agrarian University,
Yekaterinburg, Russia**

Abstract. The author proposes to apply G.Selje concept of adaptation to stresses psychophysiological mechanism for the analysis of disadaptation process on the basis of secondary sociological analysis of medical researches, conducted by V.N. Pastukhov, a candidate of Medical Sciences, and V.S. Kozhanov, who have examined 140 patients with sick kidneys and adrenal glands under stress. The research allowed to reveal the relationship between the presence of these diseases and more challenging passage of stress, disadaptation to the stress. The author explains the existence of such a relationship that production of anti-stress hormones by the adrenal cortex forms the basis of psycho-physiological mechanisms adaptation of man to stress. Therefore, patients suffering from diseases of the kidneys and adrenal glands, are disadapted to stress.

Keywords: adaptation; disadaptation; systems analysis; psychological attitude; psychophysiological adaptation mechanism; psychological adaptation mechanism; subject; individual; personality; human; subliminal Fitting; kidneys; stress.
