## **INTEGRATION OF THE COGNITION RESULTS IN LAW SCIENCE**

**Dmitry Skorlupin**

Master student in Siberian Institute of Administration, the branch of Russian Presidential Academy  
of National Economy and Public Administration  
Novosibirsk, Russia

**Abstract.** Article is devoted to search of a way to integration of the cognition results in law science. The purpose of integration consists in unambiguous understanding of legal reality and its evolution. The research has cross-disciplinary character: particular linguistic paradoxes that have appeared within the framework of the state and law theory are considered by the author not only from a legal, but also from a linguistic, psychological, and even theological point of view. The author has applied the method of investigation, when each concept is corresponded with his own peculiar form (and vice versa). The author has carried out in the article a selective deployment of the "state" form (legal system) down to the level of its implementation process: the aggregate of a number of subsystems, elements of integration. This allowed the author of the article to decompose vague ideas in the sphere of legal plurality in the Gestalt form. This article opens a new page in the discussion on the terms of law science. As the principle of integration is uniform for all areas of knowledge, article can be of interest to a wide range of scientific researchers.

**Keywords:** integration of knowledge; principle of integration; Logos; word; Gestalt; Gestalt quality; integrative thinking.
