ON POSSIBLE WAYS OF CIS INTEGRATION DEVELOPMENT

Gayane Solakhian

Professor in Shirak state university after M. Nalbandyan

Gyumri, Republic of Armenia

Abstract. For a long time after the collapse of the Soviet Union, many specialists (especially in the West) did not see a possibility of the success of integration in the post-Soviet space. However, after in several years the integration process began to acquire a new turn and relevance. Especially today, in background of globalization, integration processes became more necessary than ever. Nowadays, many post-Soviet countries prefer complementary policy. For example, Armenia, today assigned a foreign policy based on the principle of complementarity, which has an intension to balance between the vectors of integration. Complementary foreign policy which Armenian political authorities prefer, doesn't have an intention to play on the contradictions of world leaders. The political leaders of Armenia try to achieve the resolution of all existing problems in the region that may escalate into a military conflict, to achieve peace and prosperity in the region and transform Armenia into a complete, full-fledged participant in all international programs.

Keywords: CIS countries; integration processes; problems; economic sphere; political sphere, geopolitical interests.
