Abstract. The article describes the main directions of the X Ural demographic forum, which was attended by representatives of various scientific fields: economists, demographers, sociologists, historians, physicians, geographers, philosophers, as well as representatives of government bodies and public organizations, involved in demographic and migration issues politics, upbringing, education and public health. The purpose of the event was to find answers to questions: how to achieve long-term results in improving the quality of life, incomes of the population, how to create a basis for sustainable development, overcome the difficulties of gender inequality, and how to popularize a healthy lifestyle. A significant regional differentiation of quality and life expectancy, the problem of irrational migration, and the threat of depopulation in certain regions are noted. The relevance of scientific research in demography and related fields of knowledge is emphasized. A brief review of plenary reports and a number of recommendations for authorities in the implementation of national projects *Demography, Healthcare, Education* is presented.

Keywords: scientific community; demography; demographic forum; national project; regional development; human capital.
